

Guidelines for submitting strike images for the club website.

Images submitted to our club catalogs must be your images, do not submit images from any other source. If you submit images from any other source you must provide their permission for use on our site.

Also include as much of the following information with your strike submission: Coin or Medal aligned, Denomination, Edge (Smooth, Full Reeded, Part Reeded or something else), .999 location, Fine silver, Pure silver, brass, clad or something else, Mint Mark, Mint, Mintage, Date issued, and any additional information you have.

Images are required in color and the color should accurately reflect the true color of the silver strike (adjust as required).

Please submit both the design side and logo side of each strike (in or out of the case). You can do this either by using a scanner (recommended), camera, or photograph. Provide the casino and page # of the strike you are submitting if possible. Annotate which design side goes with which logo side of each strike. It is recommended that you submit the design side & turn the strike over and do the logo side of each strike even though most strikes have a common logo we may discover a new variation that we did not know existed.

Scanner - scan at 600 dpi, color, each side of each strike (300 dpi minimum). Save in JPEG format.

Camera - make sure that the details on the strike are visible. Lighting and background (white is great) are up to you. Your image will probably be JPEG.

Photographs - make sure that the details on the strike are visible. Lighting and background (white is great) are up to you. I will scan the photo to create an image for the website.

Best scans are with the strike removed from the case, in which case you should wear photo gloves so you don't leave finger prints on the strikes.

The best background is white or black however other backgrounds are acceptable. JPEG is the suggested format however other formats are acceptable.

Remember your image will be seen by the entire Internet, you want to make a good impression.

Should you have any questions please email the webmaster@silverstrikers.com
