Since it was established in 1876, Deadwood has been a town of gamblers and fortune-seekers - people willing to up the bet and have a little fun. For these select few anything is possible, and the rewards have been great. For Silverado players, the reward just got a little greater.

The Silverado is without a doubt the best gaming establishment in Deadwood. That means that our preferred players are simply the best of the best. In return for helping the Silverado remain Deadwood's premier entertainment destination, we're presenting you with these beautifully minted coins, available only to a select group of our most elite guests.

We hope this enduring token of our appreciation will remind you of our solid commitment to outstanding customer service, first-class entertainment and exceptional fun. Thank you for making the Silverado what it is today - Deadwood's Top

of the Town casino where anything is indeed possible. We look forward to seeing you again soon.

Obverse: Our striking logo curls around the eastern facade of the Silverado, which sits atop a stamp proudly bearing the name of our Deadwood home.

Reverse: The Silverado logo is overarched by the phrase that captures the essence of why our top players keep coming back for more.

Silverado
